

## **Orutsararmiut Native Council (ONC) Inseason Harvest Monitoring Weekly Report**

*July 18, 2018*

### **Summary of Interview Activities**

ONC conducted surveys with 34 fish camps from Thursday, July 12 through Monday, July 16. Overall, activity at fish camp has been low. Of the surveyed fish camps, 6 were actively fishing. 12 fish camps reported they were done fishing until coho salmon fishing season and 3 fish camps have transitioned to berry picking.

### **Fishing Progress Data**

The most up-to-date fishing progress data we have collected at fish camps indicates 40% (n=22) of respondents met their Chinook salmon harvest goals, 71% (n=39) met their chum salmon harvest goals and 49% (n=27) met their sockeye salmon harvest goals. 10 fish camps reported they did not meet their Chinook salmon goals for several reasons including lack of fishing openers, gear restrictions and poor weather.
